WORK EXPERIENCE

AutoZone BTSSC.

Software Development Intern

Chihuahua, CUU

May, 2024 – Present

- Created a front/backend for a web application where employees plan their career paths with mid-term goals, focusing on growth inside the company through feedback.
- Implemented a human resource (HR) portal estimated to be used by hundreds of employees in Spring Boot and related libraries.
- Integrated RESTful APIs in the web application to streamline interoperability with other programs.

PROJECTS

E-commerce Website - León Bicycletas

PHP & MySQL

A solution that enables customers to view and customize a wide variety of products. Additionally, developed an administrative portal for store employees in which they can keep track of the inventory of the displayed products, register customers, and perform other functions to manage the store. (See GitHub)
